PERSONAL SUMMARY

Computer Engineering student with hands-on experience building web and mobile applications through academic and personal projects. Strong foundation in frontend development, databases, and system design. Motivated to apply technical skills in real-world software development and grow as a professional engineer.

EDUCATIONS

Cambodia Academy of Digital Technology

Bachelor of Science in Computer Engineering

2023-2027

EXPERIENCE

Clothing Website

Academic Project | CADT | July 2025

- Developed a responsive e-commerce clothing website using HTML, Tailwind CSS, and JavaScript
- Implemented dynamic product listing and cart functionality using modular JavaScript
- Structured reusable UI components for scalability
- Improved page load speed by optimizing images and layout

Virtual Try-On System

Academic Project | CADT | March 2026

- Designed and prototyped the complete Virtual Try-On user interface, including image upload panels, garment selection, and model preview workflow
- Implemented responsive frontend using React with reusable component-based architecture
- Integrated image upload and preview functionality with state management using React Hooks
- Built dynamic UI controls for model selection, garment categories, and processing options
- Collaborated with backend team to integrate try-on generation API
